

CERTIFICATE OF ANALYSIS – TECHNICAL DATA SHEET

Product name	C3c, Human, clone 4				
Catalog number	HM2200-20UG				
Lot number	xxxxXXxxx-X	Expiry date	MMM YYYY		
Volume	200 μΙ	Amount	20 µg		
Formulation	0.2 μm filtered in PBS+0.1%BSA+0.02%NaN3	Concentration	100 µg/ml		
Host Species	Rat IgG2a	Conjugate	None		
Endotoxin	N.A.	Purification	Protein G		
Storage	4°C				

Application notes

	IHC-F	IHC-P	IF	FC	FS	IA	IP	W
Reference #								
Yes							•	
No								•
N.D.	•	•	•	•	•	•		

N.D.= Not Determined; IHC = Immuno histochemistry; F = Frozen sections; P = Paraffin sections; IF = Immuno Fluorescence; FC = Flow Cytometry; FS = Functional Studies; IA = Immuno Assays; IP = Immuno Precipitation; W = Western blot

Dilutions to be used depend on detection system applied. It is recommended that users test the reagent and determine their own optimal dilutions. The typical starting working dilution is 1:50.

General Information				
Description	The monoclonal antibody 4 recognizes the cleaved human C3 fragment C3c. The complement system is an im factor in innate immunity. The third complement component, C3, is central to the classical, alternative and pathways of complement activation. Activation products of the complement cascade contain neo-epitopes that present in the individual native components. The synthesis of C3 is tissue-specific and is modulated in respon variety of stimulatory agents. C3 is the most abundant protein of the complement system with serum protein le about 1.3 mg/ml. An inherited deficiency of C3 predisposes the person to frequent bacterial infections. C3 frag are deposited in tissues at sites of antibody-mediated immunopathology. In ulcerative colitis and idiopathic inflammatory bowel disease, the deposition of C3 in the diseased mucosa has been reported. Proteolysis convertases results in the cleavage of C3 into C3a and C3b. C3b becomes attached to immune complexes further cleaved into iC3b and C3f. iC3b is further processed into C3c and C3dg. The monoclonal antibody 4 reco

Storage&stability	Product should be stored at 4°C. Under recommended storage conditions, product is stable for at least one year.			
Precautions	For research use only. Not for use in or on humans or animals or for diagnostics. It is the responsibility of the user t comply with all local/state and federal rules in the use of this product. Hycult Biotech is not responsible for any pater infringements that might result from the use or derivation of this product.			

We hereby certify that the above-stated information is correct and that this product has been successfully tested by the Quality Control Department. This product was released for sale according to the existing specifications. This document has been produced electronically and is valid without a signature.
