

## **CERTIFICATE OF ANALYSIS – TECHNICAL DATA SHEET**

| Product name   | RBC, Mouse, clone 34-3C        |               |           |
|----------------|--------------------------------|---------------|-----------|
| Catalog number | HM1120-20UG                    |               |           |
| Lot number     | -                              | Expiry date   | -         |
| Volume         | 200 μΙ                         | Amount        | 20 µg     |
| Formulation    | 0.2 µm filtered in PBS+0.1%BSA | Concentration | 100 µg/ml |
| Host Species   | Mouse IgG2a                    | Conjugate     | None      |
| Endotoxin      | <24 EU/mg                      | Purification  | Protein G |
| Storage        | 4°C                            |               |           |

## **Application notes**

|             | IHC-F | IHC-P | IF | FC  | FS      | IA | IP | W |
|-------------|-------|-------|----|-----|---------|----|----|---|
| Reference # |       |       |    | 2,3 | 1,2,4,5 |    |    |   |
| Yes         |       |       |    | •   | •       |    |    |   |
| No          |       |       |    |     |         |    |    |   |
| N.D.        | •     | •     | •  |     |         | •  | •  | • |

N.D.= Not Determined; IHC = Immuno histochemistry; F = Frozen sections; P = Paraffin sections; IF = Immuno Fluorescence; FC = Flow Cytometry; FS = Functional Studies; IA = Immuno Assays; IP = Immuno Precipitation; W = Western blot

Dilutions to be used depend on detection system applied. It is recommended that users test the reagent and determine their own optimal dilutions. The typical starting working dilution is 1:50.

Positive control: Mouse erythrocytes

## **General Information**

| / 34-3C recognizes an exposed surface determinant of intact red blood cells (RBC). The high-<br>onal antibody efficiently bind to Fc receptors on macrophages inducing anemia in vivo due to<br>R)-mediated erythrophagocytosis of opsonised RBC in spleen and livers. The capacity of the<br>FcyR is responsible for its haemolytic activity. The monoclonal antibody only recognises   |  |  |  |  |  |
|--|--|--|--|--|--|
| xpressed on Mouse RBC and not on other species of RBC.   |  |  |  |  |  |
| RBC  |  |  |  |  |  |
| Rat: No; Sheep: No; Rabbit: No; Chicken: No; Human: No   |  |  |  |  |  |
| actional anti-erythrocyte autoantibodies derived from NZB mice cause autoimmune haemolytic<br>act pathogenic mechanisms. Int. Immun. 1990, <i>2</i> :1133<br>et al; High pathogenic potential of low-affinity autoantibodies in experimental autoimmune<br>J. Exp. Med. 1990, <i>190</i> :1689<br>et al; Selective increase of autoimmune epitope expression on aged erythrocytes in mice:<br>erythrocyte autoimmune responses. J. Autoimmun. 2002, <i>18</i> :17<br>, S et al; Complement activation selectively potentiates the pathogenicity of the IgG2b and<br>igh-affinity anti-erythrocyte autoantibody. J. Exp. Med. 2002, <i>195</i> :665<br>erential contribution of three different activating IgG Fc receptors (FcyRI, FcyRIII and FcyRIV)<br>p-induced autoimmune haemolytic anemia in mice. J. Immunol. 2008, <i>180</i> :1948 |  |  |  |  |  |
| Product should be stored at 4°C. Under recommended storage conditions, product is stable for at least one year.  |  |  |  |  |  |
| For research use only. Not for use in or on humans or animals or for diagnostics. It is the responsibility of the user to comply with all local/state and federal rules in the use of this product. Hycult Biotech is not responsible for any patent infringements that might result from the use or derivation of this product.<br>hat the above-stated information is correct and that this product has been successfully tested by the Quality Control  |  |  |  |  |  |
|  |  |  |  |  |  |

We hereby certify that the above-stated information is correct and that this product has been successfully tested by the Quality Control Department. This product was released for sale according to the existing specifications. This document has been produced electronically and is valid without a signature.
